

Noise Eater automatically identifies wind, distortion, and microphone handling noise in your audio file.

[Learn more](#)

Upload your audio file

Drop file here or click to navigate

Sample files

Wind Noise : [1](#) [2](#) [3](#)

Distortion : [1](#) [2](#) [3](#)

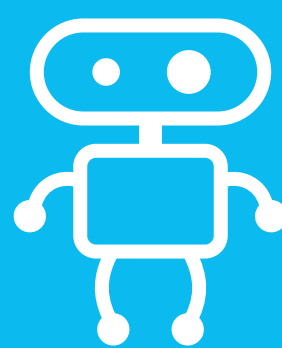

Mic handling : [1](#) [2](#) [3](#)

More options will appear once you've selected your file.

The Process

Upload your audio file

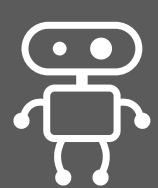

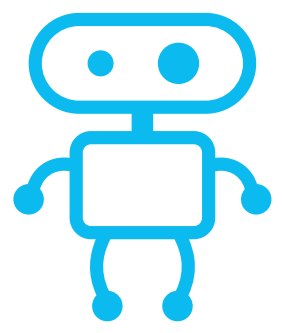

Our robots identify the noise and supply you with a report

You can download your file with noise removed, or just examine the report
